Successes & Suggestions

The Bicycle Friendly State report card is based on over 100 data points for each state and input from state agencies and advocates. Based on the information we obtained for West Virginia, the League of American Bicyclists believes the following actions will improve the safety, comfort, and accessibility of bicycling in West Virginia.

Congratulations to the West Virginia legislature on passing SB 317, which with the Governor’s signature now provides a framework for more mountain bike trail development in the state. The legislature, Departments of Transportation and Natural Resources, and other stakeholders should work to support this framework and provide funding to facilitate trail development.

The state legislature should dedicate funding for bicycle improvements and encouraging private developments of destination trails.

Establish a statewide Complete Streets committee to provide accountability for Complete Streets projects and programs. The committee should include diverse representation, formal inclusion in decision making, a workplan, and regularly held meetings.

Adopt a vulnerable road user law that increases penalties for a motorist that injures or kills a bicyclist or pedestrian.

Provide specific training to engineers and planners on how to plan, design, and implement bicycle and pedestrian infrastructure, including protected bike lanes, safe rural bicycling routes, and other facilities that have become more widespread in recent years. Significant changes in best practices have occurred recently and training is essential to ensuring that communities in your state have access to the best possible solutions for their bicycle and pedestrian safety and mobility issues.

Ensure that state guidelines, plans, policies, or other documents are updated so that they are consistent with and make it routine to implement your state’s bike plan or bicycle and pedestrian plan.

Add bicycle safety as an emphasis area in the state Strategic Highway Safety Plan and aggressively fund bike safety projects.

The state should spend more federal funding on bicyclists and pedestrians. Adopt project prioritization criteria for federal funds that incentivize bicycle projects and accommodations.

Adopt a law prohibiting a motorist from opening an automobile’s door unless the motorist is able to do so safely.

Install a Protected Bike Lane on a state-owned road.

---

1. This figure is based upon the Census Bureau’s American Community Survey (ACS) 5-year estimate.
2. This figure is based upon fatalities reported over a five-year period according to the National Highway Administration (NHTSA)’s Fatality Analysis Reporting System and the 2015 5-year ACS estimate of the number of bicycle commuters.
3. FHWA spending is based upon projects coded using any of three project types associated with bicycling and walking projects through the Federal Highway Administration (FHWA)’s Fiscal Management Information System. To calculate per capita spending we used a five-year average for fiscal years 2011-2016 and the 2015 5-year ACS state population estimate.
