The Bicycle Friendly States ranking is based on a comprehensive survey completed by state departments of transportation and state bicycling advocates. It asks comprehensive questions across 5 categories: Legislation and Enforcement, Policies and Programs, Infrastructure and Funding, Education and Encouragement, Evaluation and Planning. The results listed above provide only a snapshot of the full application. They are intended to offer some ideas for further growth in bicycle friendliness. **FEEDBACK**

- Complete the Huntington-Charleston and Route 4 (Harper’s Ferry) bicycle route connections.
- Adopt a state bicycle design manual that includes design drawings, guidance on when to use established and innovative design treatments, and public engagement.
- The state could spend more federal funding on bicyclists and pedestrians. Adopt project prioritization criteria for federal funds that incentivize bicycle projects and accommodations. Based on data from the FHWA, West Virginia is in the bottom 5 for federal funding for bicycling and walking projects based on the percentage of available federal funds obligated to those projects.
- Hold a state bicycle summit with opportunities for professional development, contact with elected officials, and networking.
- Adopt performance measures, such as mode shift or a low percentage of exempted projects, to better track and support Complete Streets Policy compliance.
- Dedicate state funding for bicycle projects and programs, especially those focused on safety and eliminating gaps and increasing access for bicycle networks.
- Adopt performance measures to decrease bicycle fatalities.
- Adopt a mode share goal for biking to encourage the integration of bicycle transportation needs into all transportation and land use policy and project decisions.
- Conduct a share the road campaign creatively addressing the issues specific to your state.
