GEORGIA

STATE ADVOCACY GROUPS: GEORGIA BIKES! & BICYCLE RIDE ACROSS GEORGIA

Summary

Georgia has some strong policies and programming, including being one of just 8 states to endorse the NACTO Urban Bikeway Design Guide.

However, there does not seem to be an overarching plan to guide the development of facilities and data collection based on conditions for bicyclists in Georgia.

Feedback Points

Since 2015, Georgia has adopted the NACTO Urban Bikeway Design Guide. This design guidance should be used in efforts to establish an urban design context in GDOT's Design Policy Manual.

Adopt a law allowing transportation agencies to post 20 mph or lower speed limits under certain circumstances.

Adopt a statewide Complete Streets law. The National Complete Streets Coalition has a model state policy and a variety of other resources to ensure adoption and implementation.

Increase dedicated state funding for bicycle, pedestrian, and shared-use trail projects and encourage the greater use of federal funds, including the Transportation Alternatives set-aside.

Improve the implementation of the Georgia DOT's Complete Streets Policy. An important aspect of implementation is coordination with local governments to capitalize on repaving as a way to build out connected and safe bicycle networks.

Establish a statewide bicycle advisory committee to provide accountability for bicycle projects and programs. The BAC should include diverse representation, formal inclusion in decision making, a workplan, and regularly held meetings (at least quarterly).

Improve education and enforcement efforts related to bicyclist safety. A particular point of emphasis could be the state's 3 foot passing law and how law enforcement can use that law for education and enforcement.

Table with 2 columns: Bicycle Friendly Actions and status. Legend: ✓ = Progress, ✓ = New in 2017. Rows: Complete Streets Law / Policy (✓), Safe Passing Law (3ft+) (✓), Statewide bike plan last 10 years, 2% or more fed funds on bike/ped (✓), Bicycle Safety Emphasis Area (✓).

Table with 3 columns: Federal Data on Biking, Rank. Rows: Ridership (0.2% of commuters biking to work, 43/50), Safety (20.2 fatalities per 10k bike commuters, 43/50), Spending (\$2.71 per capita FHWA spending on biking and walking, 18/50).

1 This figure is based upon the Census Bureau's American Community Survey (ACS) 5-year estimate.

2 This figure is based upon fatalities reported over a five-year period according to the National Highway Administration (NHTSA)'s Fatality Analysis Reporting System and the 2015 5-year ACS estimate of the number of bicycle commuters.

3 FHWA spending is based upon projects coded using any of three project types associated with bicycling and walking projects through the Federal Highway Administration (FHWA)'s Fiscal Management Information System. To calculate per capita spending we used a five-year average for fiscal years 2011-2016 and the 2015 5-year ACS state population estimate.
