Based on the information we obtained for Wyoming, the League of American Bicyclists believes the following actions will improve the safety, comfort, and accessibility of bicycling in Wyoming.

Adopt a statewide Complete Streets policy or other policy that institutionalizes planning, designing, and building safe places for people to bike and walk as part of the transportation system.

Wyoming spends a very low amount of federal funding on biking and walking per capita. Spend more and/or improve reporting practices to make sure your investments are counted.

Spend at least 2% of federal transportation funds on biking and walking improvements.

In 2021, Wyoming Pathways identified more than $100 million in potential construction projects—to build sidewalks, paths, crosswalks and bicycle lanes—through a state survey. Meeting this demand through Wyoming’s current rate of spending on bicycle and pedestrian projects would take 50 years or more. Wyoming Pathways has asked for $40 million in American Rescue Plan funds to be spent on identified needs.

In 2020, the Adventure Cycling Association found that Wyoming was one of 18 states that fails to meet minimum rumble strip standards. Wyoming should adopt guidance and best practices for the implementation of rumble strips, which are critical for motorist and bicyclist safety in rural areas.
