

BICYCLE FRIENDLY STATE

VULNERABLE ROAD USER LAWS

Vulnerable Road User laws increase protection for bicyclists and other road users who are not in cars. These laws usually involves:

- 1) harsher penalties for the violation of existing laws when that violation impacts a defined set of road users, and/or
- 2) the creation of new laws that prohibit certain actions directed at a defined set of road users.

TALKING POINTS ABOUT VULNERABLE ROAD USER LAWS

- » A Vulnerable Road User Law provides general deterrence for bad behaviors around vulnerable users.
- » A Vulnerable Road User Law can fill legal gaps between less and more severe offenses, providing additional charging options to local prosecutors.
- » A Vulnerable Road User Law recognizes and provides a tool for crashes that result in serious injury or death, which have severe societal costs.

Criminal Charges, and punishments, appear to be rare when bicyclists and pedestrians are killed.

- » A 2014 by the [League of American Bicyclists](#) reviewed media reports related to 628 bicyclist fatalities that occurred in 2012 and found reports that drivers were punished in only 12% of reported fatalities.
- » A 2013 report by the [Center for Investigative Reporting](#) found that in 238 pedestrian fatalities 60% of motorists found to be at fault or suspected of a crime faced no criminal charges.
