» Continue to expand and improve the low-stress bike network in Cedar Rapids. Update the 2014 Cedar Rapids Metro Design Standards, to ensure that your community follows a bicycle facility selection criteria that adequately increases separation and protection of bicyclists based on levels of motor vehicle speed and volume. Your current standards allow for sharrows on roads up to 40MPH, which is not recommended to provide safe and comfortable bicycling opportunities for all ages and abilities. Use FHWA’s Bikeway Selection Guide to inform your updated standards and selection criteria: https://safety.fhwa.dot.gov/ped_bike/tools_solve/docs/fhwasa18077.pdf

» Expand on-bike bicycle safety education to be a routine part of education for students of all ages, and ensure that schools and the surrounding neighborhoods are particularly safe and convenient for biking and walking. Work with the school district, local bicycle groups, and interested parents to create Safe Routes to School programming for all K-12 schools.
» Expand bicycle education opportunities for adults. Host a League Cycling Instructor (LCI) seminar to increase the number of local LCIs in your community, allowing you to expand cycling education for youth and adults, deliver Bicycle Friendly Driver education to motorists, and have more experts available to assist in encouragement programs. Visit bikeleague.org/ridesmart for more information.

» Develop a community-wide trip reduction ordinance/program, commuter incentive program, and a Guaranteed Ride Home program to encourage and support bike commuters in Cedar Rapids.

» Hire a full-time Bicycle & Pedestrian Coordinator for the City. Expanding the staff time focused on bicycling-related projects and programs would help in scaling up your BFC efforts to move the city closer to Silver.

» Your application indicated that your community is currently updating a bicycle master plan. This is a great step to improving conditions for bicycling and institutionalizing processes for continual improvement. Your Bicycle Master Plan update should take advantage of best practices that are applicable to a community of your size, including the use of separated and protected bike lanes, targeted education programming, and demonstration projects to help the community understand possible bicycle facilities. Ensure that the new Plan includes specific and measurable goals, a strong implementation plan, and dedicated funding or an annual budget to ensure its success.
