» Keep up the great momentum to continue improving conditions for bicyclists in Portage! Ridership is still relatively low compared to other Silver-level Bicycle Friendly Communities, but with a continued investment in building out a safe and comfortable bicycle network across the entire community, complimented by ongoing education and encouragement will move the needle on this in years to come.

» Continue to improve and expand Portage's low-stress bikeway network for all ages and abilities, and ensure that your community follows a bicycle facility selection criteria that increases separation and protection of bicyclists based on levels of motor vehicle speed and volume. Improve your database inventory of roadways categorized by speed and traffic volume to inform future planning.

» Lower your speed limits on residential streets to 20 mph or less. Introduce road diets and traffic calming measures to ensure compliance. Develop a system of bicycle boulevards, utilizing these quiet neighborhood streets, that creates an attractive, convenient, and comfortable cycling environment welcoming to cyclists of all ages and skill levels. Use the Bicycle Boulevards section of the NACTO Urban Bikeway Design Guide for guidance.

» Host a League Cycling Instructor (LCI) seminar to increase the number of local LCIs in your community. Having several active instructors in the area will enable you to expand cycling education for youth and adults, recruit more knowledgeable cycling ambassadors, deliver Bicycle Friendly Driver education to motorists, and have experts available to assist in encouragement programs.
» Create a signature annual event, such as an open streets event or annual ride. A signature annual event can be a catalyst for the creation of a culture that supports bicycling. Signature events can be based around iconic infrastructure, art, or architecture, locally important businesses or local celebrities, or other existing cultural touchstones.

» Congratulations on the recent launch of the Bike Portage bike share system! Work to increase the number of bikes and docking stations available in the new system. Bike sharing is a convenient, cost effective, and healthy way of encouraging locals and visitors to make short trips by bike, make bicycling more accessible to all, and to bridge the ‘last mile’ between public transit and destinations. Be sure to collect ridership data to inform future updates and investments in the system.

» Increase the availability of end-of-trip facilities for bike commuters in Portage, such as additional public bicycle repair stations and air pumps. Consider investing in a centrally-located Bicycle Station or Hub that provides secured parking, and changing room, lockers, and/or showers for bicycle commuters.

» Develop a community-wide trip reduction ordinance/program, commuter incentive program, and a Guaranteed Ride Home program to encourage and support bike commuters in Portage.

» Portage could be well-served by a bike co-op or non-profit community bike shop. In communities your size, co-ops have had major success in building a culture around youth/family cycling and coupled with after-school programming, job training and a connection point with local clubs/advocacy, this can be win-win-win.

» Continue to develop and invest in a community-wide bicycle count program that utilizes several methods of data collection including automated bicycle counters to provide long-term data on bicycle use at fixed points and mobile counters to provide periodic or before/after data related to changes in your community’s road or bicycle network. Observational counts and surveys can supplement automated data in order to collect demographic information and examine social equity goals to build on the existing Bike Equity Index work that Portage has been doing.
